Surprise Class Activity

Its time to check your knowledge 🙂

Note: Please do it individually and don't discuss/get help from others. Write your name at the top of the page. No need to use any tool, solve it by hand and submit the hard copy to your TA.

Think about any application that you use frequently in your daily life and **extract two use cases** (any of your choice). You need to complete the following requirements.

i) Provide the name/URL of the application you chose.

ii) Draw the use case diagrams and write the steps to complete the use case.

iii) Draw class diagrams.

iv) Draw sequence diagrams.
